

28 October 2021

Province Resources Limited (ASX:PRL) (the **Company** or **Province**) is pleased to report on its September 2021 quarter activities.

HyENERGY™ PROJECT

Scoping activities continued on the HyEnergy™ Project throughout the quarter, focussed on increasing the technical understanding of the Project, progressing land tenure options, engagement with Traditional Owners and other stakeholders, commencing on-site environmental studies and undertaking preliminary discussions with potential customers.

Technical Activities

Under the terms of its binding Memorandum of Understanding (MoU) with Total Eren, scoping activities progressed in order to identify the potential land requirements needed to support a minimum 8GW facility producing green hydrogen for domestic and international customers.

One of the shipping solutions under active consideration is the production of compressed hydrogen for export. Province signed an MoU with Global Energy Ventures (ASX:GEV) to evaluate the technical and commercial feasibility of exporting green hydrogen from the HyEnergy™ Project.

The scope includes transport from the onshore hydrogen gas production facility to an offshore ship loading buoy and then on to nominated Australian or other Asia-Pacific markets utilising GEV's compressed hydrogen shipping solution.

The purpose of the Study is to provide the HyEnergy™ Project partners with sufficient confidence to warrant the selection of compressed hydrogen as a preferred transport method in the next phase of project engineering.

The MoU is non-binding, non-exclusive, and expires on 31 December 2022.

GEV was subsequently successful in an application to the Western Australian Government and the WA Renewable Hydrogen Fund for funding of the HyEnergy™ Project export study. The grant is up to \$300,000 excluding GST.

Subsequent to the quarter, GEV announced key consultants had been appointed to support the Study, being WSP, ERM and Oropresa. WSP is the project lead, responsible for the overarching technical and commercial assessment. ERM will undertake environmental management with a focus on defining risks, constraints, and the path to approvals. Oropresa's appointment covers the offshore terminal design and Gascoyne shipping operations. GEV also received Approval in Principle from the American Bureau of Shipping for its pilot compressed hydrogen ship with a 430-tonne cargo capacity.

Land Tenure

Discussions continued with the Western Australian Government on securing land tenure for the project, including potential legislative reforms to simplify the pathway to tenure certainty. Province is progressing several activities under the existing provisions of the Land Administration Act 1997 to enable preliminary access to sites and enable more enduring tenure.

Province was issued a Section 91 Licence over a 98.6 sq km site north of Carnarvon. The section 91 licence under the Land Administration Act allows the Company to begin environmental and other on-ground studies. The site, known as the Town Common, would be the location of the HyEnergy™ Project no net emissions or green hydrogen production facility and potentially some generation assets. Discussions are progressing well with the Shire of Carnarvon and the Western Australian Government over a lease for the area.

Environmental Studies

Flora surveys were completed over the Town Common area and parts of the greater project area; a report will be provided in due course. Fauna surveys will commence next quarter.

Native Title

Much of the area identified as suitable to support the HyEnergy™ Project falls within the Gnulli native title determination handed down by the Federal Court in 2019. Province is respectful and supportive of the role played by Traditional Owners in caring for their land and helping guide responsible development.

The Yinggarda Aboriginal Corporation and the Baiyungu Aboriginal Corporation are the relevant Prescribed Bodies Corporate (**PBC's**) for the HyEnergy™ Project development area. Province is establishing relationships with Traditional Owners to support the general principle of being good visitors on their lands, and also to support the necessary consents which will be required at various stages of the development.

Offtake

Province has commenced preliminary discussions with potential customers of the HyEnergy™ Project. Conversations are focussed on creating a greater understanding of the development, including the assessment of possible shipping solutions for intended markets.

GNAMA NICKEL-COPPER PROJECT, FRASER RANGE

Gnama North

Province received approval for a Programme of Works for a Phase 1 Air Core drilling program consisting of approximately 3,200m, with drill lines spaced 800m north-south, and drill holes spaced 100m east-west.

The planned drilling aims to test the Fraser Range gabbros with the potential to host prospective meta-pyroxenites. Limited surface testing has occurred in these areas and the aim of the program is to better map the bedrock geology and geochemical characteristics to identify the most prospective areas to carry out both a high-powered EM survey and also deeper drilling into bedrock.

Drilling is subject to completion of Heritage surveys by the Ngadju Native Title Aboriginal Corporation.

Gnama South

Province engaged Blueprint Environmental Strategies to manage ecological flora and fauna surveys over the prospective Gnama South Prospect.

The flora survey was completed during the quarter, with data collected on the following:

- Small Scale Detailed Baseline Flora Survey
- POW Exploration Flora Inspections
- Clearing Permit Application

Identification of sampled plant species arising out of the survey will now be carried out following which the Company will be furnished with a Flora Report. A Programme of Work for drilling over the area will be lodged with the provision of the Flora Report – results dependent. An RC and Diamond drilling program is planned at the Gnama South prospect to target the possible continuation of a significant nickel and copper anomalism at depth below historic drill results (refer ASX Announcement 8 October 2021).

Subsequent to the end of the quarter a fauna survey was completed, comprising a basic vertebrate survey, with an additional targeted survey for evidence of the Mallee fowl and the host ant of the Arid Bronze Azure Butterfly. The Company will be provided with a Fauna Report setting out the results of the fauna survey in due course.

SKÅNE VANADIUM PROJECT, SWEDEN

Province continued to await the ruling of The Land and Environment Court of Appeal at Växjö District Court regarding approval to conduct its proposed ten-hole drilling programme at the Tomelilla Target in the Skåne Vanadium Project. In the September quarter 2020, The Land and Environment Court at Växjö District Court rejected objections to the programme from landowners living nearby Killeröd 1 and Fågeltofta 1. This decision was subsequently appealed by the landholders to The Land and Environment Court of Appeal.

The proposed programme comprises 10 holes in an area where historic drilling reported grades at Fågeltofta-2 (9.7m @ 0.61% V₂O₅) and Gislövshammar-2 (9.2m @ 0.67% V₂O₅) and from surface sampling at Flagabro Creek (~10m @ 0.61% V₂O₅). The programme is designed to test these higher grade areas for mineralisation and the Company hopes to replicate historical results which have been consistent throughout the formation.

Province Resources Ltd
ABN 83 061 375 442

358 Rokeby Road, SUBIACO WA 6008
PH: +61 8 9329 6862

For personal use only

Province has estimated a maiden JORC Mineral Resource of 116.9Mt @ 0.39% V₂O₅ at the Hörby Target in the Skåne Vanadium Project. The high tonnage, near surface, resource estimated at Hörby reflects the widespread stratigraphic hosted vanadium mineralisation across the licences, giving confidence that further drilling could generate additional Mineral Resources over higher-grade targets (including Tomelilla) on the 98% of the licences that remain unexplored.

PASCALLE COPPER GOLD PROJECT, PATERSON PROVINCE

As announced to ASX on 16 September 2021, Province entered into a binding agreement with AIM listed Greatland Gold plc (AIM:GGP) to sell the Pascalle Project.

Conditional on the transfer of third party rights, GGP shall acquire EL45/5316 from Province for a consideration of \$50,000.

In addition, Province is the sole applicant for exploration licences EL45/5754 and EL45/5755 and the holder of EL45/5756. Province has granted GGP an option, upon exercise of which GGP will pay consideration of \$150,000 plus \$200,000 in cash or GGP shares (at GGP's election) for the withdrawal of the applications and sale and purchase of EL45/5756, and if necessary, the sale and purchase of the licences created if the applications are granted.

CORPORATE

Cash balance and Related Party Payments

At the end of the quarter the Company had a cash balance of \$23.3million.

Payments set out in Section 6.1 of the attached Appendix 5B relate to director salaries and fees in the quarter.

Exploration Expenditure

The Company's exploration expenditure on its projects is set out in the accompanying quarterly cash flow report (Appendix 5B), summarised as follows:

Description	Amount \$
Exploration Projects	201,000
HyEnergy™ Project	103,000

Key Board Appointment

Roger Martin was appointed as a Non-Executive Director as well as taking on an additional corporate affairs consulting role.

Roger is a former energy executive with a wealth of experience in government relations and public affairs. As Chief of Staff from 2017 to 2021 to Ben Wyatt the Western Australian Treasurer, Minister for Finance and Minister for Aboriginal Affairs and Lands, Roger played a key role in energy policy, land

tenure and native title issues. Prior to his time in Government, Roger was vice president of corporate affairs at Woodside Energy. Roger brings excellent leadership skills and strong relationships across industry, government, and non-government organisations to Province.

ESG

The Company is committed to building Environmental, Social, and Governance (ESG) credentials. Province is making ESG disclosures against the World Economic Forum (WEF) Stakeholder Capitalism Framework. The WEF framework is a set of common metrics for sustainable value creation captured in 21 core ESG disclosures. Hundreds of companies worldwide are disclosing against this core ESG framework.

Province uses this universal ESG framework to align its mainstream reporting on performance against ESG indicators. By integrating ESG metrics into its governance, business strategy, and performance management process, Province diligently consider all pertinent risks and opportunities in running its business.

Province's progress will be reported quarterly and will shortly be live on its website. Province's progress from last quarter to the current quarter is set out below.

Province's quarterly ESG activity summary:

- Ongoing verification of Province's reported ESG metrics
- Increased transparency of "People" and "Prosperity" metrics via ESG reporting

The information in this document that relates to the estimation and reporting of the Mineral Resource is extracted from the report entitled "Maiden JORC Mineral Resource at Skåne" created on 18 December 2019. The information in this report that relates to Exploration Results is extracted from ASX announcements previously lodged. The Company confirms that it is not aware of any new information or data that materially affects the information included in prior announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from previous announcements.

This announcement has been approved by the Board.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
