

ASX Announcement (ASX:PRL) 30 April 2024

March Quarter 2024 Report

HyEnergy® PROJECT

During the quarter, global engineering firm Aurecon closed out some additional pre-feasibility study work on the Town Common project area.

Since the inception of the HyEnergy® project, reforms by the Western Australian Government to the fees charged by the Environmental Protection Authority (EPA) in respect of assessment of project referrals have increased dramatically. Fees for the assessment of the HyEnergy® project are an upfront initial payment of 80% of the \$900,000 assessment fee as well as any potential complexity fee. The Company has been working with the State on project tenure for over two years, however, due to the still unknown timeframe for Section 88 finalisation, and following a meeting with senior officials from the Department of Water and Environmental Regulation, the Company has decided to put the environmental referral on hold for six months. The Company will continue to maintain regular engagement with the Western Australian Government at ministerial and departmental levels on tenure matters. The Company hopes some of the activities can be finalised soon, with a timeline of approvals to date shown in Figure 1.

GNAMA NICKEL-COPPER PROJECT, FRASER RANGE

Previous drilling at Gnama confirmed the presence of fertile mafic-ultramafic intrusions similar to those that host the Nova nickel-copper deposit. A key element in exploration for magmatic-hosted nickel-copper mineralisation is the morphology of the intrusive body and the architecture of the magma pathways. Magnetic and gravity data, and inversion modelling using this data, can provide this information which in turn provides targets for future work. Targeting work will be ongoing during 2024 with the aim of delineating targets for drilling later in the year.

SKÅNE VANADIUM PROJECT, SWEDEN (ALL TENEMENTS EXPIRED)

The Swedish and UK subsidiaries which held this asset are still in the process of being wound up.
